BREATHE EASIER WITH CLEAR ANSWERS.

Our low-dose CT screening can detect lung cancer early,
when it's most treatable.

[Learn more](#)

Screening that's quick and painless, yet precise.

CAMC is one of the first hospitals in the country to use an innovative new technology to find and diagnose lung cancer sooner. By using the most precise imaging tests available, we can get you a clear answer, fast.

When cancer is found early with low-dose CT screening, patients can more often undergo minimally invasive surgery and have less lung tissue removed.

We're here for you.

The team at CAMC will answer your questions about lung cancer screening and streamline the referral process. We'll be here to guide you through prevention, diagnosis and every step of treatment.
